Ubuntu Server 20.04.2

- Does NOT run 'live' from a USB stick.
- Install Guide:
<https://ubuntu.com/server/docs/install/step-by-step>
- Upon completing installation can add 'tasksel'
\$ sudo apt install tasksel
\$ tasksel
- Perform on-line adding and removing of the various GUI Desktop flavours using *tasksel*.

Tasksel options...

```
[ ] Kubuntu live CD
[ ] Lubuntu live CD

[ ] Xubuntu desktop
[*] OpenSSH server
[ ] Basic Ubuntu server
```

Ubuntu Server 20.04.2

After installing a GUI desktop the system will boot to a GUI.

Turn Desktop GUI off and go back to being a server with:

```
$ sudo systemctl set-default multi-user
```

...and do a...

```
$ startx
```

...when you want a GUI Desktop.

...or have GUI desktop on boot with...

```
$ sudo systemctl set-default graphical
```
